

The Economical Soil Surfactant with Staying Power

Sixteen90 is an economical alternative for those interested in a longer lasting surfactant. Sixteen90 is proven to remain effective in the soil for up to three months, reducing water repellency and localized dry spots.

For turf managers seeking more flexibility to adjust to seasonal fluctuations, Sixteen90 can also be safely applied monthly.

Features & Benefits

- Consistent 90 day control over soil water repellency and localized dry spots.
- Improves water movement in soils.
- Does not break down due to stressful weather conditions.
- Safe for all turf varieties.

 **HYDRATION**

USE RATES:

- **Long Term:** Apply at 16 oz/1000 sq. ft. in 5 gallons of water. Apply a post-treatment syringe cycle to activate. For control beyond three months, a subsequent application of 8 oz/1000 sq. ft. in 2 gallons of water may be required.
- **Monthly:** Apply 4-6 oz/1000 sq. ft. per month.

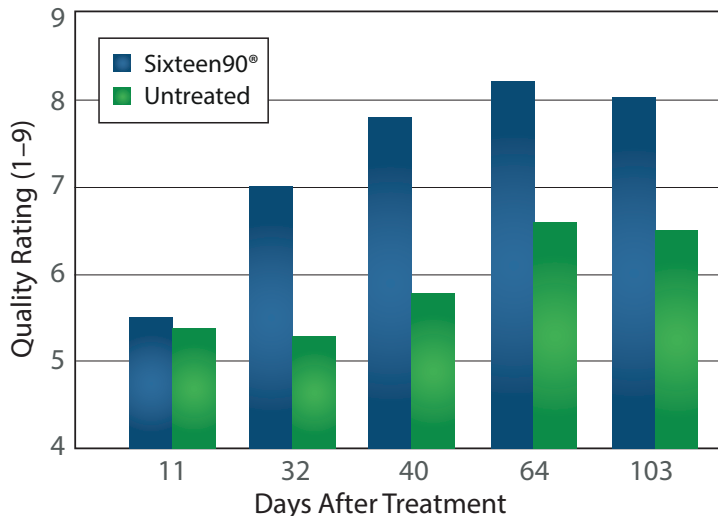

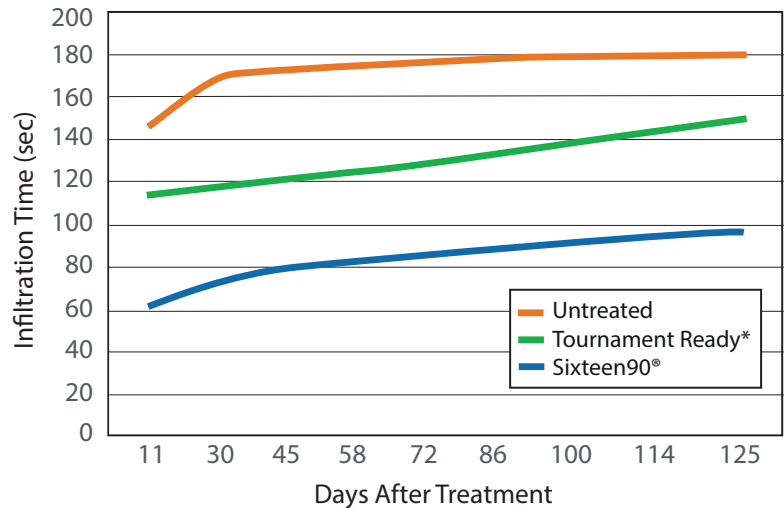

See label for complete usage information.

Please check with your Aquatrols distributor for available pack sizes.

Better Season-Long Performance

In it for the Long Haul

Sixteen90 gives you better season-long control than competing products. Research conducted in Garden City, Kansas shows that Sixteen90 provided the greatest reduction in water repellency and performed more consistently than competitive products throughout the four-month test period.

Continued Quality

Sixteen90 not only gives you long-term control over water repellency, but it also improves and maintains turf quality as well. A study conducted at the University of Florida – Ft. Lauderdale shows that Sixteen90 improved and maintained optimal Bermudagrass quality over the duration of the trial period.
