

TurfRx®

Micro+

DUAL-ACTION NUTRITION FOR MAXIMUM TURF PERFORMANCE.

What is TurfRx Micro+?

TurfRx Micro+ is more than a micronutrient package—it's a complete plant performance tool with a technology advantage that sets it apart. By combining a precise balance of Boron, Copper, Iron, Manganese, and Zinc with Redox Active Molecules, TurfRx Micro+ delivers dual-action nutrition that works both through the leaf and in the soil.

This unique formulation drives fast turf response, deeper color, improved charge balance, and long-lasting nutrient stability. With TurfRx Micro+, your turf doesn't just look better—it performs better under stress and stays stronger, longer.

✓ TurfRx Micro+ Benefits at a Glance:

- Deeper, longer-lasting color.
- Dual absorption – fast foliar response + stable root uptake.
- Balanced nutrition for consistent growth, energy use, and charge stability.
- Enhanced resilience under heavy play, heat, and stress.
- Stronger root systems for stress recovery.
- Backed by advanced Redox Active Molecule chelation + complexing technology.

✓ Included Biostimulants:

- Protein Hydrolysates
- Fulvic Substrates

Chelated. Complexed. Complete.

📄 Label Analysis:

Boron.....0.66%	Iron..... 2.1%	Zinc 2.1%
Copper0.66%	Manganese 2.1%	

Rate	Timing	Special Notes
0.25 - 1 gal/acre	Every 1 - 4 weeks, or as needed	Does not have to be watered in right away

TurfRx®

Micro+

DUAL-ACTION NUTRITION FOR MAXIMUM TURF PERFORMANCE.

Why TurfRx Micro+ is Different:

✓ Dual Technology Advantage

- Delivers Boron, Copper, Iron, Manganese, and Zinc—enhanced with Redox Active Molecules for greater efficiency and plant performance.

✓ Chelated + Complexed

- Most turf micros rely only on amino acid chelation. **TurfRx Micro+** goes further by combining chelation and complexing, which allows for both rapid foliar absorption and extended soil stability.

✓ Two pathways for uptake

- Designed for immediate nutrient response through the leaf plus long-term availability in the root zone.

✓ Precision Ratio

- Each micronutrient is formulated to enhance turf color, energy balance, and overall plant health.

✓ Redox Active Support

- Promotes charge balance in the plant, improving stress tolerance and metabolic efficiency.

The bottom line: Most turf micronutrient products stop at foliar absorption. TurfRx Micro+ goes further—giving you the fast response you want on the surface and the soil stability your roots need for lasting results.
